Biometric Data Purge

(Biometric Logs Removal Notification System)

USER MANUAL

2026

System Overview

Biometric Data Purge is a notification system that'll remind the user to confirm removal of biometric logs every 20th of the month (last cutoff of the month). It utilizes local routing and permissions to send push notification to the desktop, ensuring consistent system alerts.

Installation and Deployment

The system is designed to be plug-and-play with a minor system task scheduling setup.

Initial System Setup:

1. Server requirements: Ensure the target system has XAMPP (with Apache and MySQL installed) or something similar installed.
2. File Placement: Copy the whole project folder to the system's XAMPP htdocs folder.
3. Database Setup: Database will be automatically setup upon the initial start of the system login page (http://localhost/biometric_data_purge/login.php). User can login using default account credentials (username: admin, password: adminpassword).

Hayakawa Electronics (Phils.) Corp

Task Scheduler Setup for System Notification:

1. Open Microsoft Task Scheduler.
2. Click Create Task.
3. Enter desired task name (e.g. Biometric Data Purge Notification System).
4. Select "Run whether user is logged in or not"
5. Change "Configure for" to Windows 10 / 11.

- Setting the Trigger-

6. Go to Triggers tab and select New.
7. Set "Begin the task" to On a Schedule.
8. Make the task "Daily", set the start time to 6:00 AM, and set "Recur every" to 1 day/s.
9. In advance settings, enable "Repeat task every" and set it to 270 minutes (4.5 hours) for duration of 1 day.
10. Enable "Stop all running tasks at the end of repetition duration."
11. Make sure the Enabled checkbox is marked then click OK.

Hayakawa Electronics (Phils.) Corp

– Adding the Action Script –

12. Go to Actions tab and select New.
13. Set Action to “Start a program”.
14. Click browse and locate “runPurgeInv.vbs” inside the root project folder.
15. Click OK.

– Setting up Task Conditions –

16. Go to the Conditions Tab and copy these settings:

Create Task

General Triggers Actions **Conditions** Settings

Specify the conditions that, along with the trigger, determine whether the task should run. The task will not run if any condition specified here is not true.

Idle

☐ Start the task only if the computer is idle for: 10 minutes

Wait for idle for: 1 hour

☒ Stop if the computer ceases to be idle

☐ Restart if the idle state resumes

Power

☐ Start the task only if the computer is on AC power

☒ Stop if the computer switches to battery power

☐ Wake the computer to run this task

Network

☐ Start only if the following network connection is available: Any connection

OK Cancel

- Adjusting Task Settings -

17. Go to Settings Tab and copy these settings:

The screenshot shows the 'Create Task' dialog box with the 'Settings' tab selected. The dialog has a title bar with a close button (X) and a tab bar with 'General', 'Triggers', 'Actions', 'Conditions', and 'Settings'. The 'Settings' tab is active, showing a list of checkboxes and dropdown menus for task configuration. The settings are as follows:

- ☒ Allow task to be run on demand
- ☒ Run task as soon as possible after a scheduled start is missed
- ☒ If the task fails, restart every: 1 minute
- Attempt to restart up to: 3 times
- ☒ Stop the task if it runs longer than: 3 days
- ☒ If the running task does not end when requested, force it to stop
- ☐ If the task is not scheduled to run again, delete it after: 30 days
- If the task is already running, then the following rule applies:
Do not start a new instance

At the bottom right, there are 'OK' and 'Cancel' buttons.

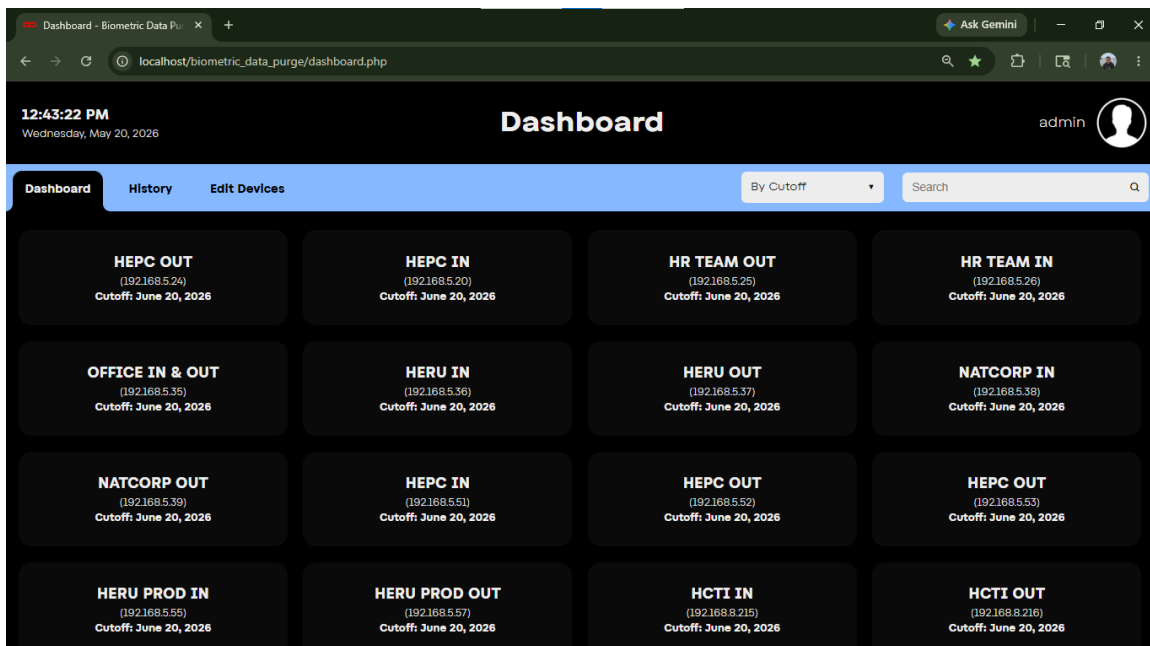

18. Click OK.

Use of System

The Biometric Data Purge have three (3) main pages: Dashboard, History, and Edit Devices. Dashboard lists all devices with their corresponding cutoff date. History displays previous log deletion confirmations for each device which are group by section. Edit Devices enables the user to add, edit, or remove devices from the list as long as they follow the format of the data file.

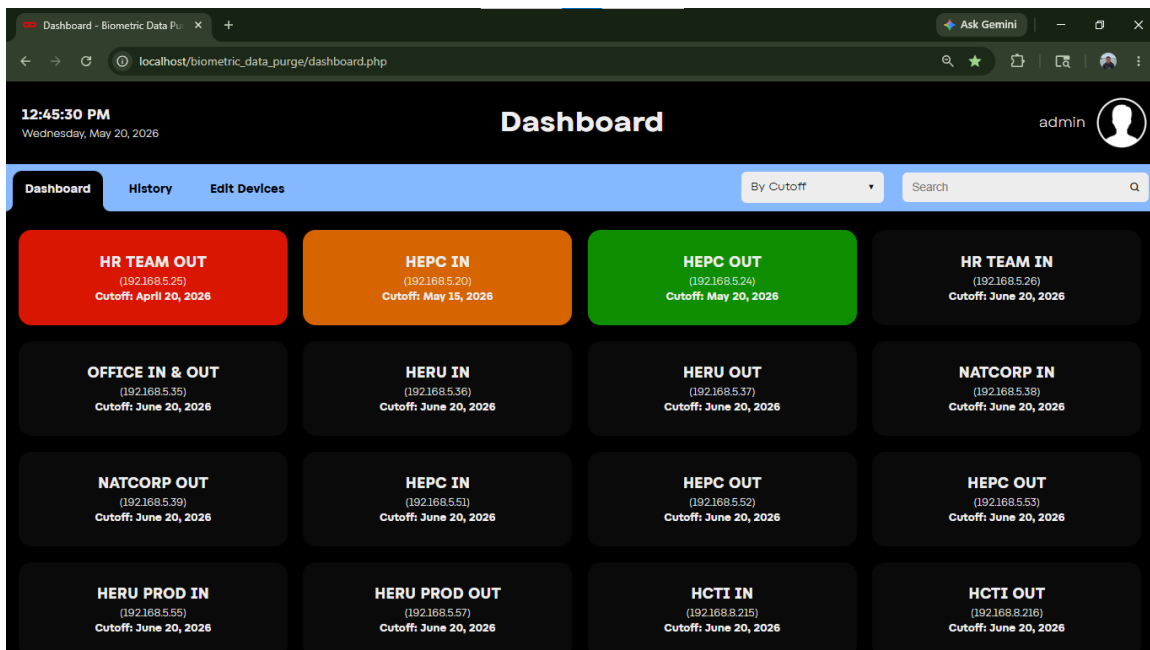

Dashboard

Hayakawa Electronics (Phils.) Corp

The Dashboard includes a sort menu and a search bar. The sort menu offers two (2) choices: By Cutoff and Alphabetical. The device display items will change colors depending on their cutoff date.

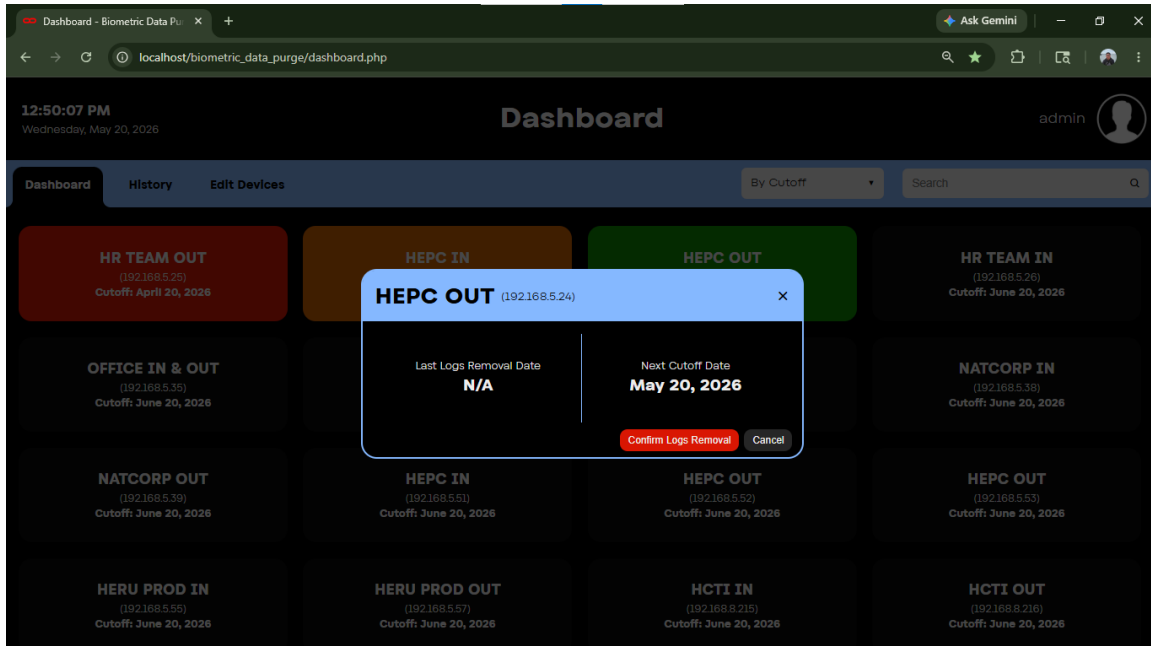

- Black / Gray: The default color, cutoff date is still in the future.
- Green: Cutoff date is today.
- Orange: Log removal is due but still inside the one week mercy window.
- Red: Log removal is overdue.

Hayakawa Electronics (Phils.) Corp

User will need to click on a device for the modal to pop up. This will give the user the option to confirm removal of biometric logs for that specific device.

Upon user's confirmation, the system will record the date and save it on a history log, and will automatically set the cutoff date of that device to the 20th of next month.

Edit Devices

This section gives the user the ability to add new devices and edit or delete existing devices. This will only be the only way for the user to read and edit the devices file. The file is encrypted outside of the system for security reasons.

In adding or editing a device, keep this format in mind:
[IP Address] - [Section / Group]:[IN / OUT] - [month day, year]
e.g. 192.168.1.1 - GROUP:IN - JUNE 20, 2026

Technological Stack and Environment Specifications:

- Runtime Environment: PHP 8.2.12 or higher
- Database Management System: MariaDB 10.4.32 / MySQL v5.7+
- Web Server Compatibility: Apache HTTP Server / Nginx
- Core Backend Architecture: Procedural & Object-Oriented PHP leveraging PHP Data Objects (PDO) for secure database abstraction.
- Frontend Ecosystem: Native HTML5, modern vanilla CSS3 (utilizing root CSS variables for global states), and asynchronous client-side JavaScript (ES6+ Architecture).
- Client Monitoring Integration: Progressive Web App (PWA) capabilities via native Service Workers (sw.js) and modern Web Push Notification APIs.
